## SUMMARY

This newspaper index report highlights editorial coverage trends in seven prominent Pakistani newspapers (*Pakistan Observer*, *The News*, *Business Recorder*, *Daily Times*, *Dawn*, *The Express Tribune*, and *The Nation*) during the month of August 2025. The report is divided into three sections: national-level editorial coverage, international-level coverage, and a combined overview of topics, with a minimum occurrence threshold of 15 entries per subject to ensure significance. A total of 908 editorial articles were indexed across the seven English-language newspapers (Figure 1). The data indicates that 32 national topics and 26 international topics were covered (Figures 2 and 3). However, applying the threshold of a minimum of 15 entries, the analysis reveals a stronger editorial focus on domestic issues, 18 national topics met this criterion, compared to five international topics (Figure 4). At the **national level**, prominent topics included *Environment* (76 entries), *Government* (63 entries), *International Relations* (47 entries), *Economy* (39 entries), *Power and Natural Resources* (31 entries), *Education* (29 entries), *Social Issues* (27 entries), *Defence* (27 entries), *Current Issues* (26 entries), *Law, Legislature and Judiciary* (26 entries), *War, Peace and Security* (26 entries), *Politics* (25 entries), *Banking and Finance* (18 entries), *Terrorism and Extremism* (18 entries), *Science & Technology* (18 entries), *Kashmir Azad & Jammu Kashmir* (17 entries), *Health* (17 entries), *History, Archeology, Geography & Travel* (15 entries) and others. This national trends shows a multi-layered discourse, where environmental issues emerged as a top entry due to flood situation in the Punjab province along with concentration on governance, international relations, and economic development, but with continued resonance of social issues and political contestations. On the **international front**, India Politics, Policies, Conflicts, Foreign (62 entries), *The United States* (38 entries), *World International Relations and Foreign Policies* (22 entries), *OIC, Islamic World Conflicts, and West vs Muslim World theme* (22 entries), *China* (16 entries), and others.

Overall, these trends suggest that Pakistan's press in August 2025 was deeply preoccupied with two intertwined layers of reality: (1) national crises of environmental issues (mainly due to flood), governance, economy, and environment that impact daily life, and (2) Indian politics and Policies during flood situation in Pakistan, along with global conflicts and alliances (especially in relation to the Gaza genocide by Israeli atrocities) that directly affect Pakistan's security and foreign policy.

### Newspapers’ and Their Number of Entries

The editorial report of seven major Pakistani newspapers in English language provides trends and patterns publishing in these selected newspapers (**Data attached as Annexure – I**). In August 2025, a total of 908 editorial articles were indexed across seven prominent Pakistani English-language newspapers (Figure 1). It shows that Pakistan Observer 173 (19.05%) contributed the highest number of indexed items, closely followed by Business Recorder 146 (16.08%) and The News 144 (15.86%). The Daily Times and The Express Tribune shared equal number of entries 119 (13.11%), followed by Dawn with 116 (12.78%). Meanwhile, The Nation accounts for the smallest proportion 91 (10.02%), suggesting relatively limited coverage compared to its counterparts.

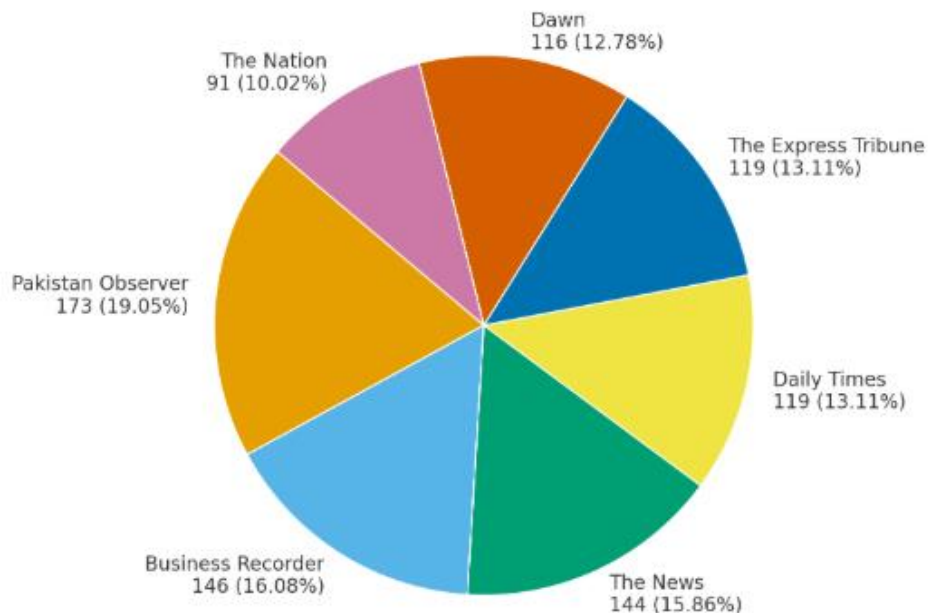

Figure 1: Selected seven newspapers and their number of entries included in the index

### Newspapers Editorial Coverage at National Level

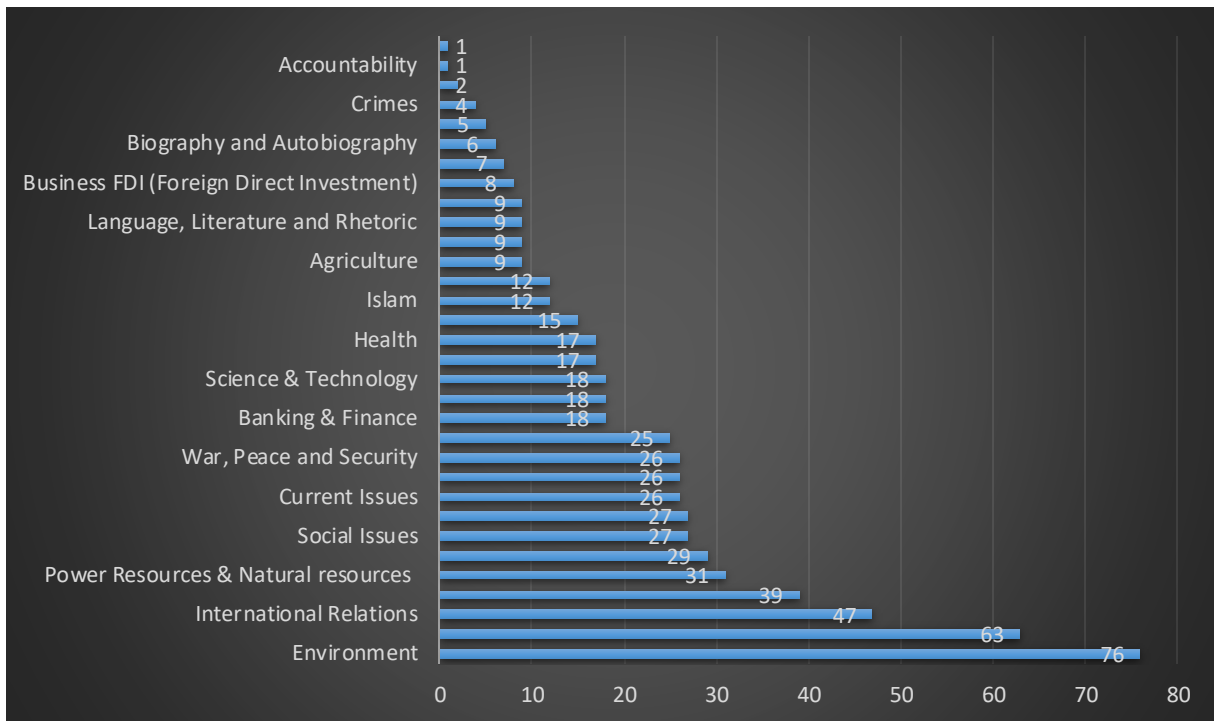

The indexed newspaper’s editorial entries provide a comprehensive overview of the topics covered in the Pakistani context, highlighting the diversity of issues addressed across seven major newspapers (Data attached as Annexure – I). Overall, it covers 32 various topics at national level in these seven Pakistani newspapers in English language (Figure 2).

The national editorial coverage in August 2025 was strongly shaped by pressing **environmental concerns**, which received the highest number of entries (76). This surge is directly linked to the devastating flood situation in the country, particularly in Punjab, which dominated

media narratives. Newspapers highlighted not only the scale of the disaster but also the urgent calls for mitigation, relief efforts, and long-term strategies to prevent such crises. Following closely, **government coverage (63 entries)** reflected the state's central role in responding to these challenges. Discussions spanned relief operations, policy responses, and the broader responsibilities of governance in addressing environmental, economic, and social issues. The high visibility of government affairs underlined the expectation for effective state action in times of national crises. **International relations (47 entries)** remained another key focus, with newspapers analyzing Pakistan's position in a shifting global and regional context especially with the USA, China, and middle east. On the economic side, **economy (39 entries)** and **power resources & natural resources (31 entries)** continued to receive sustained attention with the recent Pak-US trade deals. Media discourse reflected concerns over inflation, energy shortages, and natural resource management, all of which directly impact livelihoods and national development. Similarly, **education (29 entries)** and **social issues (27 entries)** were foregrounded, emphasizing the human dimension of national challenges, from reforms in the education sector to social disparities intensified by crises.

Security-related topics such as **defence (27 entries)**, **war, peace and security (26 entries)**, and **terrorism and extremism (18 entries)** reflected ongoing anxieties over regional tensions and internal security threats. At the same time, coverage of **law, legislature and judiciary (26 entries)** pointed to debates over accountability, rule of law, and institutional performance. Other notable areas included **science and technology (18 entries)**, often framed as critical for disaster management and modernization, and **Kashmir issues (17 entries)**, which continue to shape the political discourse. **Health (17 entries)** also remained a visible concern, especially in light of flood-related health crises and system preparedness. Meanwhile, subjects such as **human rights (12 entries)**, **Islam (12 entries)**, and **women's rights (9 entries)** reflected socio-political debates and advocacy trends. Lower-frequency categories such as **arts, media, literature, agriculture, and civil service** received selective attention but demonstrated the wide thematic range of newspaper editorials.

Overall, the August 2025 editorial coverage reveals a strong intersection between **environmental disasters and governance**, with a sharp rise in discussions about the state's role in crisis response. Alongside, issues of international relations, economy, and security continued to occupy editorial space, but the floods acted as the most defining narrative of the month.

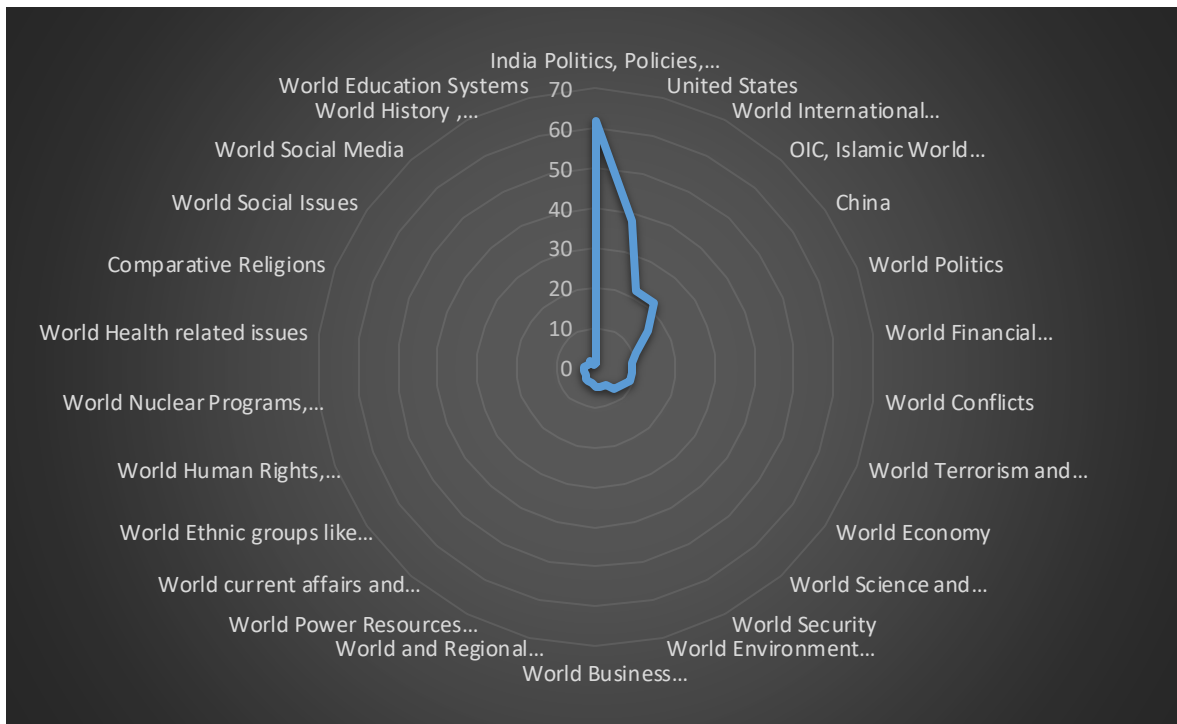

**Figure 2:** Newspapers coverage on various topics at national level

### Newspaper Editorial Coverage at Global Level

The international-level coverage across the indexed newspapers provides a detailed insight into the global focus and priorities reflected in the media. Overall, there are 26 various topics have been covered at global level in these seven Pakistani newspapers in English language (Figure 3).

The analysis of editorial coverage highlights a significant focus on **India (62 items)**, making it the most discussed global subject in newspapers. This prominence is largely due to the ongoing political dynamics under the BJP government, as well as heightened regional tensions following the recent India-Pakistan war. The debate was further fueled by remarks from former U.S. President Donald Trump, who controversially pointed to India’s defeat in this conflict, drawing both nationalistic responses within India and critical reflections abroad. The **United States (38 items)** ranked second, reflecting its continued dominance in international affairs, ranging from domestic politics to its global influence on security, trade, and diplomacy. Other notable areas of coverage included **World International Relations and Foreign Policies (22 items)**, **OIC and Islamic World Conflicts (22 items)**, and **China (16 items)**, showing that geopolitical rivalries, Muslim world dynamics especially about Gaza genocide by Israeli atrocities, and China’s growing global influence remain at the forefront of editorial attention. Themes such

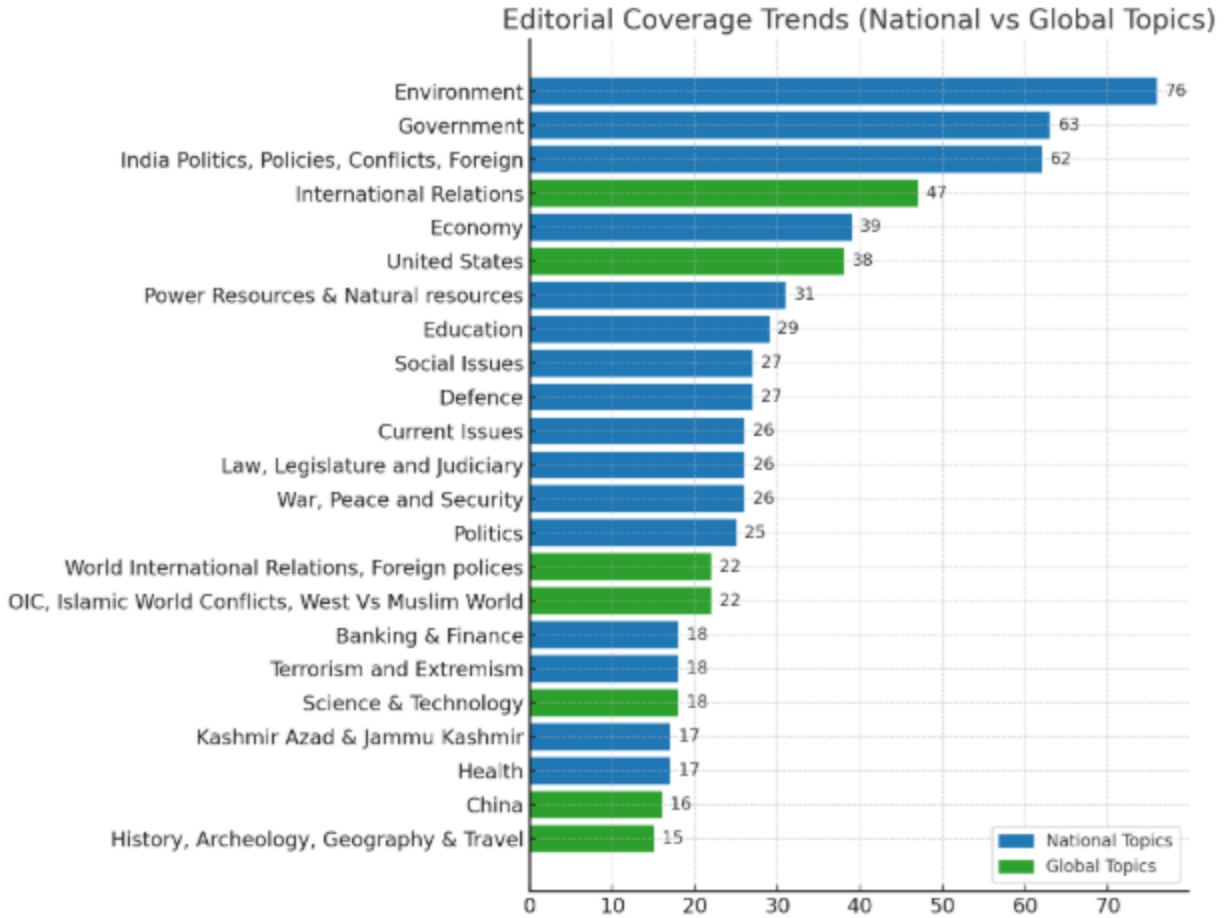

as **World Politics (11)**, **Financial Institutions (9)**, **Conflicts and Terrorism (9 each)**, and the **World Economy (8)** underline how structural issues in governance, economics, and security continue to be pressing concerns. Meanwhile, specialized but relatively less frequent topics like **World Science and Technology (7)**, **Environment Protection Strategies (5)**, and **Human Rights/NGOs (3)** suggest that while these areas are recognized, they are often overshadowed by hard politics and conflicts. At the lower end, subjects such as **Comparative Religions (2)**, **World Social Media (2)**, and **World Education Systems (1)** appear less frequently, reflecting the editorial priority given to geopolitical and conflict-driven issues over softer global themes.

**Figure 3:** Global coverage areas or topics in Pakistani English newspapers

**Major Publishing Trends (combing both National and Global) in Pakistani Newspapers**

Based on the application of the 15-occurrence threshold (combining local and international subjects), 23 topics meeting the minimum frequency threshold of 15; 18 entries pertain to national contexts and five from the international context (Figure 4).

**Figure 4:** Major publishing trends in Pakistani newspapers (with minimum frequency of 15)

**Environment (76 entries)** emerged as the most covered topic, largely due to the devastating floods in Punjab and subsequent discussions on climate and disaster management. **Government (63 entries)** reflected its role in crisis mitigation, relief operations, and policy responses, showing the state’s central role in managing national issues. **India-related politics (62 entries)** dominated global–regional discourse, mainly due to **BJP politics, war-related tensions, and Trump’s remarks on India’s defeat** in the recent conflict. **International Relations (47 entries)** and **United States (38 entries)** highlighted Pakistan’s engagement with the global community, including diplomatic negotiations and US–Pakistan ties. **Economy (39 entries)** gained substantial coverage given inflation, IMF-related debates, and fiscal reforms. Other key national concerns included **education (29 entries)**, **social issues (27)**, and **law, legislature, and judiciary (26)**, showing a balance between governance, social development, and institutional accountability. On the global side, **OIC and Islamic World conflicts (22 entries)** and **China (16 entries)** reflected Pakistan’s foreign policy focus on Islamic solidarity and strategic partnership

with China. **Security-related themes** such as **defence, war, peace & security, terrorism, and extremism (18–27 entries each)** remained significant, pointing to ongoing domestic and global security challenges.

Overall, the editorial coverage shows a **dual emphasis**: **Nationally**, environment and governance dominate, reflecting urgent socio-political realities. **Globally**, India, the US, and Islamic world conflicts remain central, highlighting Pakistan’s geopolitical positioning.

## ANNEXURE – I
